Ensure the long-term performance of landscape work with SRW geotextiles. We have versatile fabric for any job – including General Landscape, Weed Control, Premium Landscape, Drainage & Filtration, Stabilization, drainage and filtration and heavy duty erosion control.
Spunbond
SRW Spunbond polypropylene geotextiles are commercial grade landscape fabrics with high puncture and tear resistance. Spunbond geotextiles allow high water flow and excellent permittivity. Professional landscapers consider SRW Spunbond fabric to be a favorite due to its strength and versatility.

Benefits
- High water flow/permittivity
- Easy to cut, easy to use
- Puncture and tear resistant
- Weed control

Applications
- Behind Retaining Walls
- French Drains/Drainfields
- Gardens/Planters
- General Landscaping

Products
- SB2—10 year
- SB3—20 year
- DF1.5 & DF2—Drainfield

Polyspun
SRW Polyspun polypropylene is a fine denier fiber laid in a continuous extrusion. This compressed and point-bonded fabric creates a strong and versatile weed barrier.

Benefits
- Creates a weed barrier
- Allows air, water and nutrients to pass through
- Promotes healthy plants by reducing weed growth

Applications
- Gardens and Landscapes
- Underlayment for Mulch & Decorative Rock
- Separation

Products
- Residential—6 year
- Contractor—10 year
- Professional—15 year

Don’t forget the staples!
Hold your geotextiles, geogrid and erosion control products in place. Staples feature pointed tips and convenient packaging. 11 gauge; 4", 6" or 8" (10.16cm, 15.24cm or 20.32cm) lengths.

SRW Staple Setters make applying staples easy. Its magnetic end keeps the staple in place until set. The Staple Setter is for use with 11 gauge, 1" (2.54cm) steel staples of any length.

Pro Plus & Ground Cover
SRW Pro Plus is a geotextile made of polypropylene fabrics, together with plant lines every 12˝ (30.48cm) for easy plant alignment.

Benefits
- Strength of a woven, permittivity of a non-woven
- Ground cover has highest UV protection
- Planting stripes make spacing quick & easy
- Retains moisture
- Weed control

Applications
- Soil/Landscape
- Weed Barrier Under Gardens, Decks

Products
- Pro Plus IV—20 year
- Pro Plus V—25 year
- GC3—Ground Cover
**Ground Cover**

SRW Non-Woven needle-punched polypropylene fabrics are non-biodegradable geotextiles produced by joining together staple fibers in a random network to form high-strength, dimensionally-stable fabrics.

**Benefits**
- Allows high water flow
- Soil separation for added stability
- High strength/dimensionally stable
- Promotes healthy vegetation
- Prevents soil erosion
- Rot & mildew resistant

**Applications**
- Drainage Protection
- Heavy Rip-Rap/Boulder Retaining Walls
- Filtration
- Underlayment

**Products**
- LS3—General landscape
- NW4, NW4.5 & NW6—Drainage
- NW7 & EC8—Erosion Control
- NW10—NW16—Construction

**Convenient Roll Sizes!**

For your convenience, SRW offers a great variety of roll sizes, sure to meet most of your project needs. We also carry many large, construction-size rolls. Need a specific size? Just ask!

Other fabric types available:
- SRW NON-WOVEN: NW10, NW12, NW16.
- SRW WOVEN: SS5, SS6, 275HS, 375HS, 575HS, MM402, MM403, MM700.

Non-stocking items available. Call for details 1-800-752-9326.

**Meeting DOT specifications?**

SS5 meets ICPI specifications for medium survivability of geotextiles, see reference chart on back page. NW6 meets AASHTO specifications for Non-woven Subsurface Drainage and Separation.

**Save money and gain performance!**

SS5 and SS6 can improve the long-term performance of your project by 50-70%, and can save as much as 30% in base material and associated costs.
