STRINGALONG

Features

- Create easily visible lines from a distance
- No need to remeasure after the height is set; take down the line and put it back up as needed
- Built to last from nylon with a brass insert and zinc coated thumbscrew
- Makes raising and lowering elevations easy
- Ability to create three to four different lines from different directions at one time
- Use for hardscaping, surveying, fencing, concrete and masonry
- Fits round stakes up to 1”

Use StringAlong on your next project!
