Applications:
- Permeable paver systems

Benefits:
- High strength/excellent permittivity
- Monofilament woven
- Stabilization
- Separation
- Reinforcement

Instructions:

1. Prepare Subgrade
   Level and smooth out subgrade. Clear site of sharp objects and large rocks that could puncture fabric during installation.

2. Overlap Fabric
   Place fabric on area smoothly and pull taut. Overlap 18-24", depending on subgrade strength. For best results, secure fabric with SRW Fabric Staples by staggering 1.3 staples per square yard.

3. Add Graded Crushed Stone
   Carefully back fill with graded crushed stone onto fabric. Properly installed Permeable 350 can improve the long-term performance of your project 50-70%.
