Erosion Control Products

Erosion Control blankets are woven from a material that is designed to slow down the speed at which water moves across the surface. These blankets also provide excellent protection for seeds and newly sprouted grasses or plants. SRW has teamed with Western Excelsior to offer a variety of materials to fit your projects needs.

Silt Fence & Stakes

SRW Silt Fence is a woven fabric that temporarily controls sediment on construction sites to protect water quality in nearby streams, rivers and lakes from sediment in storm water runoff. SRW Silt Fence comes with pre-attached posts. Stakes are pointed (like a pencil) for easy installation.

Drainfield Geotextiles

SRW Drainfield polyester geotextiles are commercial-grade drainage fabrics with high puncture resistance. They provide high water flow rates and excellent filtration.

Straw Blankets
- Certified 100% weed-free straw
- Erosion control up to one year
- Serves as a mulching layer

Excelsior Blankets
- 100% Rocky Mtn. Excelsior material
- Erosion control up to 18 months
- Serves as a mulching layer

Coconut Blankets
- Erosion control up to three years
- Serves as a mulching layer

Wattles

Straw Wattles are weed free and help stabilize slopes by slowing, spreading and filtering overland water flow.

Round Top Pins & U-Shaped Staples

Round Top Pins and U-Shaped Staples prevent erosion control products from movement and allow easy visual inspection.

NEED TO MEET DOT SPECS?

SRW Products offers Silt Fence to meet most specifications. Call for information: 1-800-752-9326.
Sediment Control Products

Soil erosion during construction can find its way to the city’s water system through storm sewers, storm grates and storm inlets. SRW partners with Dandy Products to ensure your small or large projects are protected. Other sizes and options available upon request.

Dandy Curb Sack®
- Unique patented design keeps silt, sediment and debris out of storm systems
- Conforms to shape of curb

Dandy Curb Bag®
- Sizes to fit any curb and gutter inlet
- Easy to install, maintain, inspect and reuse
- Built-in protective overflow design

Dandy Sack®
- Affordable price
- Super easy installation. No rebar required
- Internal straps cradle the grate for added support and security when installing and removing

Dandy Bag®
- Unique, patented design keeps silt, sediment and debris out of storm systems
- Reduces or eliminates the need to flush or clean inlets
- Very easy to install, maintain, inspect and can be re-used

Dandy Dewatering Bag®
- More convenient and easier to use than sediment traps or other alternatives
- Available with optional oil absorbents
